

**657—9.18(124,155A) Remote dispensing site operations.**

**9.18(1) Automated pharmacy system.** On any day when the remote site is opened and prior to providing telepharmacy services, the managing pharmacy shall perform a test of the automated pharmacy system with the remote site to ensure proper operation. A log shall be created and maintained that includes the date and the test results and that identifies the individual performing the test.

**9.18(2) Remote site staffing.** A remote dispensing site shall be staffed by one or more qualified certified pharmacy technicians under the continuous supervision of a pharmacist at the managing pharmacy at all times that the remote site is open to provide telepharmacy services. Continuous supervision does not require the pharmacist to be physically present at the remote dispensing site, but the pharmacist shall supervise telepharmacy operations electronically through the automated pharmacy system.

**9.18(3) Supervising pharmacists.** The managing pharmacy shall have a sufficient number of pharmacists on duty to ensure that a pharmacist is able to provide all services offered by the managing pharmacy and to ensure appropriate supervision of all telepharmacy services. The board may limit the number of remote dispensing sites under the management of a single managing pharmacy.

**9.18(4) Prescription drug orders.** A remote dispensing site may receive written or electronic prescription drug orders or refill requests in accordance with the policies and procedures designated by the pharmacist in charge. As provided in policies and procedures, the qualified certified pharmacy technician at the remote site shall either transmit the prescription drug order or refill request to the managing pharmacy or input the prescription drug order or refill request so that the pharmacist at the managing pharmacy may perform a prospective drug use review and verify the prescription information prior to authorizing dispensing at the remote site. A pharmacy technician at a remote site shall not receive oral prescription drug orders from a prescriber or prescriber's agent. Oral prescription drug orders shall be communicated directly to a pharmacist.

**9.18(5) Drug use review.** A pharmacist at the managing pharmacy shall conduct a drug use review as specified in 657—8.21(155A) prior to authorizing delivery of the prescription to the patient or the patient's caregiver at the remote dispensing site.

**9.18(6) Prescription label.** A prescription dispensed at a remote site shall be labeled with the following information:

- a. Serial number (a unique identification number of the prescription) which shall, in some manner, identify the remote site that dispensed the prescription.
- b. The name and address of the remote dispensing site.
- c. The name, address, and telephone number of the managing pharmacy.
- d. The name of the patient or, if such drug is prescribed for an animal, the species of the animal and the name of the owner.
- e. The name of the prescribing practitioner.
- f. The date on which the prescription is dispensed.
- g. The directions or instructions for use, including precautions to be observed.
- h. The initials or other unique identification of the supervising pharmacist at the managing pharmacy and of the technician who dispenses the prescription at the remote dispensing site.
- i. The name, strength, and quantity of the drug dispensed.

(1) If a pharmacist selects an equivalent drug product for a brand name drug product prescribed by a practitioner, the prescription container label shall identify the generic drug and may identify the brand name drug for which the selection is made, such as "(generic name) Generic for (brand name product)."

(2) If a pharmacist selects a brand name drug product for a generic drug product prescribed by a practitioner, the prescription container label shall identify the brand name drug product dispensed and may identify the generic drug product ordered by the prescriber, such as "(brand name product) for (generic name)."

**9.18(7) Verification prior to dispensing.** A pharmacist at the managing pharmacy shall approve each prescription before it leaves the remote site. If the qualified certified pharmacy technician at the remote site enters original or new prescription information into the automated pharmacy system, the pharmacist at the managing pharmacy shall, prior to approving dispensing of the drug via the AMDS,

verify the information entered against an electronic image of the original prescription. The technician may transmit the prescription to the pharmacist by scanning the prescription into the automated pharmacy system or by placing the prescription in an appropriate position to facilitate viewing of the original prescription with video communication between the remote site and the managing pharmacy. Using the video communication component of the automated pharmacy system, the pharmacist shall verify the accuracy of the drug dispensed and shall check the prescription label for accuracy. The dispensing record, the patient profile, and the prescription label shall identify both the pharmacist who approved dispensing the prescription and the certified pharmacy technician who completed the dispensing and delivery of the prescription to the patient.

**9.18(8)** *Patient counseling.* A remote dispensing site shall contain an appropriate area for patient counseling. The area shall be readily accessible to patients and be designed to maintain the confidentiality and privacy of a patient's conversation with the pharmacist. A pharmacist at the managing pharmacy shall utilize the video and audio components of the automated pharmacy system to counsel each patient or the patient's caregiver on all new prescriptions pursuant to 657—6.14(155A). As provided in subrule 9.5(4), a sign shall be posted at the remote site to ensure that all patients are informed that a pharmacist will provide counseling regarding any prescription dispensed from the remote site. A nonpharmacist may not extend an offer to counsel or ask questions of a patient or the patient's caregiver if such offer is intended to screen or limit the patient's interaction with a pharmacist.
